

Leave A Living Legacy

Help Restore Nature For
Future Generations

Supporting tree planting, biodiversity, wildlife recovery and environmental restoration projects in the UK and worldwide.

Why Gift a Tree Exists

Built from a personal journey and a desire to give something back.

Andy Fields & Panda

In 2018, I was given just six months to live after being diagnosed with aggressive head and neck cancer.

Like many people facing something life-changing, it made me think deeply about what truly matters in life and what we leave behind for future generations.

Thankfully, after intensive treatment, I was given the all clear.

That experience completely changed my outlook on life and inspired me to create something positive that could continue helping people and the planet long into the future.

That is why I created Gift a Tree.

What began as a personal mission has now grown into a large-scale environmental initiative helping to restore nature through tree planting, biodiversity projects and conservation work both in the UK and overseas.

Every tree planted represents hope for future generations and a commitment to protecting the natural world we all share.

“I wanted to create something that would outlive me and continue helping future generations.”

And for people to become part of something real.”

- Andy Fields
Founder, Gift a Tree

Leave A Legacy That Lives On

Many people choose to leave gifts in their will to causes that reflect their values and beliefs.

For those who care deeply about nature, wildlife and the future of our planet, environmental legacy giving can become a meaningful way to continue making a positive difference long into the future.

A legacy gift to Gift a Tree supports:

- Large-scale tree planting
- Habitat restoration
- Biodiversity projects
- Conservation initiatives
- Environmental education
- Long-term nature recovery

Ways people may choose to help:

- A percentage gift in a will
- A fixed sum gift
- Land for conservation or planting

Legacy giving is entirely personal and there is never any pressure or expectation. Every conversation is treated with complete respect, care and confidentiality.

Restoring Nature Through Real Action

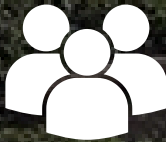

Tree Planting

Thousands of trees are planted through projects in the UK and Tanzania, helping restore forests, improve ecosystems and support communities.

Biodiversity

Our work helps encourage wildlife, improve habitats and support long-term biodiversity recovery through carefully planned environmental projects.

Future Generations

Gift a Tree exists to help create a greener, healthier and more sustainable future for generations still to come.

Creating Visible Environmental Action

Real Projects - Real Impact

Before

After

Bradford Farm - Devon

Gift a Tree focuses on meaningful environmental projects designed to create genuine and lasting impact for nature, wildlife and future generations.

From restoring landscapes and planting thousands of trees in Tanzania, to improving biodiversity on our own land in Devon, every project is built around long-term environmental recovery and sustainability.

Over recent years we have witnessed incredible changes including:

- increased bird populations
- returning wildlife
- improved habitats
- flourishing woodland
- expanding biodiversity
- healthier natural ecosystems

What was once bare or underused land is gradually becoming thriving habitat once again.

Educating Future Generations

Supporting environmental education, sustainability awareness and future generations

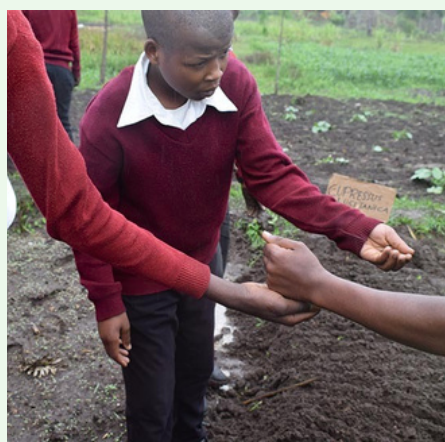

However, our vision goes beyond planting trees alone.

We also believe future generations must understand the importance of protecting the natural world if meaningful environmental change is to continue long into the future.

That is why Gift a Tree also supports environmental education and awareness by helping young people learn about:

- ♥ Biodiversity
- ♥ Conservation
- ♥ Tree planting
- ♥ Wildlife protection
- ♥ Sustainability
- ♥ Caring for the environment

By inspiring younger generations to value and protect nature, we hope the positive impact of every legacy gift will continue for many decades to come.

Your Legacy Could Help Create

- New forests and woodland
- Wildlife habitats
- Biodiversity recovery
- Environmental education projects
- Community planting initiatives
- Long-term conservation projects
- Sustainable environmental improvement
- Future planting land acquisition

Every legacy, regardless of size, has the potential to help create meaningful environmental change for future generations.

A Personal & Respectful Conversation

Andy Fields

We understand that legacy conversations are deeply personal.

If you would simply like to learn more, ask questions or explore possibilities confidentially, I would be very happy to speak with you personally with no obligation whatsoever.

Gift a Tree was created from a genuine desire to leave something positive behind for future generations, and every legacy conversation is approached with care, honesty and respect.

Including Gift a Tree In Your Will

Leaving an environmental legacy can help support tree planting, biodiversity and nature recovery for future generations.

Any gift, regardless of size, has the potential to create lasting environmental impact.

Family Comes First

Providing for loved ones will always remain the priority.

Many people simply choose to leave a small percentage of their estate after family and personal wishes have been taken care of.

Types of Gifts

- A percentage of an estate
- A fixed sum gift
- Land for conservation

Speak To A Solicitor

We always recommend speaking with a qualified solicitor when making or updating a will. They can help ensure your wishes are properly recorded.

Confidential Conversations

If you would simply like to learn more, Andy would be very happy to speak with you personally and confidentially with no obligation whatsoever.

Thank You

Together We Can Leave The World Greener Than We Found It

Helping restore forests, protect biodiversity and support future generations through meaningful environmental legacy giving.
